HISTORY

LOUTRAKI THERMAL SPA is

located in the city of Loutraki, in the north cove of the Corinthian Gulf. It has been a famous place for its healing waters since the ancient times, then called "Thermae" and owes its name to the thermal baths which took place in the curative springs.

The ancient city of "hot springs" owes its name to the "" THERMAL" ARTEMIDA, protector of the hot thermal springs and is the favorite city of the gods. There, APOLLO, god of the sun and the tranquility and the mother of the gods HERA had temples for their worship.

The miraculous waters of Loutraki, have linked their name since the ancient times with the treatment of many eminent personalities, among them the Roman military and political Lucius Cornelius Sulla (138 BC-78 BC), who, with the use of thermal waters of Loutraki, was healed from a serious skin disease. The beneficial effects of thermal water of Loutraki were well known much earlier in the ancient world, since the first reference for their beneficial properties had already been done by the historian Xenophon, who in his works "Greek", states that Spartan soldiers after battles resorted to the curative waters of the Thermae to rest and rejuvenate, in the today's city of Loutraki.

The use of thermal waters of Loutraki with the beneficial effects continued throughout the era of Byzantine and post Byzantine years and then Loutraki, with reference to the thermal baths, was identified as a metropolitan center of tourism in Greece and the first treatment station..

Loutraki is the birthplace of the Greek Thermalism and it's characterized as the premier spa resort of Greece. _____

ARCHAEOLOGICAL SITES & LANDMARKS

The strategic position of the city in the entrance of the Peloponnese combined with the vast history of the region that spans from almost 3.000 years B.C. until today, scatters sites and landmarks throughout the Municipality of Loutraki, Perachora and Agioi Theodoroi..

THE CORINTH CANAL

The famous Corinth Canal is the absolute landmark of our **Municipality which separates the Peloponnese from mainland** Greece and connects the Gulf of Corinth with the Saronic Gulf.

Today the Corinth Canal is the 2nd most visited landmark in Greece after the Parthenon.

HISTORY

The Corinth Canal, though only completed in the late 19th century, was an idea and dream that's dates back over 2000 thousand years. Several rulers in antiquity dreamed of digging a cutting through the Isthmus.

The first to propose such an undertaking was the tyrant Periander in the 7th century BC. However the technical capabilities in ancient times made his idea impossible to implement. Instead, he developed the "Diolkos", which served the purpose of carrying ships in a wheeled vehicle and transferred them from one side to the other.

The concept of the canal opening was revived again during the late 1800's. After several years and many tryouts, the Corinth Canal was finally completed and started operations on the 25th of April, 1893.

The remnants of the Ancient Diolkos still remain intact in the area.

Australian stunt Motocrosser Robbie Maddison jumped over the 85-metre wide Corinth Canal at height of nearly 100 metres!

Pilot Peter Besenyei teamed up with Red Bull to conduct a flight pass through the Corinth Canal

The Corinth Canal is still in use today, though many newer and larger ships are too large to pass through any more. However, the canal is still used by many smaller ships, yachts and there are also cruises organized where you can travel on a boat along the canal.

GERANEIA MOUNTAINS

Geraneia mountains, are one of the most outstanding mountain ranges of Peloponesse, embraced by three gulfs - the Saronian Gulf, the Corinthian Gulf and the Gulf of Alkyonides.

These picturesque mountains offer a wide range of outdoor activities for nature lovers like hiking, trekking, mountain biking, canyoning, motorcycling and for the extreme sports enthousiasts, parachuting and paragliding.

Geraneia mountains are named after cranes! According to the thrilling ancient myth, a terrible cataclysm broke out in the era of Defkalionas and Megaros, Zeus's son, struggled to survive by "swimming" towards the top of the mountain, guided by the cranes that were flying over him! From Makriplagi, the highest peak of Geraneia - 1.369m long - the view is absolutely awesome! The mountain forms a 37 km long natural barrier between Central Greece and Peloponnese.

What's more, Geraneia Mountains are enlisted in Natura 2000, the European Net of regions under protection, thanks to its rich fauna and vegetation. There have been traced and recorded approximately 950 different species of plants (lush vegetation, fir & plane trees, oak and myrtle trees, pine trees) and wild animals (jackals, foxes, cranes, royal eagles, hares). Spread around the hills, you may find lots of natural springs with crystal water, while, scattered among the pine forest, you can trace one of the numerous monasteries and churches
